DETAILED ACTION

1. This Office Action is responsive to the Amendment filed on 6/15/07. Accordingly, claims 1-10 are currently pending.

REASONS FOR ALLOWANCE

- 2. Claims 1-10 are allowed.
- 3. The following is an examiner's statement of reasons for allowance:
- -Regarding to independent claim 1, none of prior art of record teaches or suggests an apparatus for compressing a GPS signal, as claimed. Barnard (5,241,561), previously cited, teaches the claimed apparatus except he fails to teach that the apparatus comprises a second mixer for receiving a carrier-removed GPS signal and a separately received frequency reference signal that is received at the apparatus separately from the GPS signal and outputting a resultant signal, as claimed. In light of specification of the instant application (figure 1 and col. 6, line 17 to col.. 7, lines 4), the separately received frequency reference signal is defined being a received signal (114), transmitted from a separate location and received at the apparatus, namely, not internally generated by the apparatus. Barnard does not teach such a separately received frequency reference signal received by the apparatus. Barnard teaches a second mixer for receiving a carrier-removed GPS signal and a frequency reference signal wherein the frequency reference signal, however, is internally generated by the apparatus. It would not have been obvious for one skilled in the art to implement Barnard for leading such the implementation to the claimed invention.

-Regarding to independent claim 5, none of prior art of record teaches or suggests a receiver comprising an antenna for receiving a GPS signal from a GPS satellite and for receiving Art Unit: 2611

radio signals over a radio link to a base station, the radio signals including a frequency reference signal; a second mixer for receiving a carrier-removed GPS signal, being derived from the GPS signal, and the frequency reference signal and outputting a resultant signal; a comb filter for filtering the resultant signal and obtaining a first output comprising filter lines; and a frequency shifter for shifting the filter lines to produce a compressed GPS signal.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Phuong Phu whose telephone number is 571-272-3009. The examiner can normally be reached on M-F (8:00 AM - 4:30 PM).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jay Patel can be reached on 571-272-2988. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
